1 Introduction

This document demonstrates an ensemble model based on stacking methodology.

2 Loading R packages

```
# Loading necessary R packages
if (!requireNamespace("readr", quietly = TRUE)) {
  install.packages("readr")
}
if (!requireNamespace("openxlsx", quietly = TRUE)) {
  install.packages("openxlsx")
}

# Loading custom functions
source("utils.R")
```

3 Loading Raw Data

```
df<- reading_data("attrition","modeldata")
```

4 Conclusion

This utility function provides a convenient way to read multiple data formats with a consistent interface. It's particularly useful for:

- Data analysis workflows
- Teaching materials with diverse data sources
- Projects requiring data from multiple formats

For questions or suggestions about this function, please contact the author:
